

## CHEESY FRUIT KEBABS

*Help our feathered gardening friends find energy giving foods during winter time in a fun interactive way.*

### WHAT YOU WILL NEED :

- Apples (wind fall or shop bought) (1 medium apple gives 4–5 kebabs)
- Cheese (older/harder cheese is best) (allow 3 cubes per skewer)
- Raisins (approx. 9 per skewer)
- Floristry wires approx. 30cm length ([www.countrybaskets.co.uk](http://www.countrybaskets.co.uk) or ask your local florist, or cut garden wire to length)
- Chopping board, knife and tubs to hold food pieces
- Scissors and ribbon (or string) to hang skewers if preferred

Step 1. Cut apples (approx. 12/16 pieces from one apple) and cheese into 1 to 2cm cubes (make the pieces manageable for your group).

Step 2. Bend the bottom 4cm of the wire upwards to prevent the food from slipping off the skewer's bottom end.

Step 3; Thread food pieces in alternative patterns onto the wire leaving approx. 6cm clear at the top of the skewer.

Step 4. Bend the clear top of the wire downwards to make a 'hook' which you can latch onto a branch or add a piece of ribbon or string to tie more securely.
